

## Wastewater Treatment Chemicals

We can meet all of your wastewater treatment chemical needs for **industrial and municipal applications**. Our chemical's technical specialists can help you improve your process, reduce costs or solve compliance problems. Our experienced staff can help you navigate the ever more demanding regulatory environment most firms operate in. Through our knowledge of chemicals and equipment we can help you develop innovative solutions to meet your demanding needs. Nikojati designs and manufactures wastewater treatment equipment. Moreover our Service Group can provide **on-site service at your facility** for water treatment system start-up, maintenance and operations. Contact us online or call (603) 56353799 for all your wastewater needs.

### Products and Application

#### Coagulants

Inorganic and Organic Polymers

Products for coagulation of tough to treat waste streams: Rubber Gloves Manufacturer, Food Processors, Metal Finishers, Chemical Manufacturers, Paper & Pulp Mills, Textile and Electronics Manufacturers. Improved TSS, BOD, Oil & Grease and metals removal.

#### Flocculants

Flocculants for clarification, flotation and sludge dewatering.

#### Sludge Conditioners

**Applying the correct** Polymers help the dewatering of sludges to achieve highest possible cake solids.

#### Neutralization

Neutralize acids and bases at lowest cost with least solids generation.

#### Heavy Metal Precipitants

NJ Chembreak and Precipmet products provide metals removal to ultra-low ppb concentrations.

#### Defoamers

Nikojati complete defoamer line eliminates foam from all processes: food processors, pulp & paper, textile, automotive and metal finishers. Food grade defoamers available.

#### Filter Aids

Unique products to improve filtration and dewatering rates.

#### Activated Carbon

Powdered and granular products for removal of highly soluble contaminants including BOD, COD, pesticides, PCBs and colors.

#### Odor Control Agents

Control of obnoxious odors.

#### Reducing agents

Hexavalent chromium reduction
